

# CheckEze® Self-Checkout Software

Built from 40 years of experience in library systems, CheckEze is truly the most user friendly, effective patron Self-check system available. Economical, the software is feature-rich. It supports virtually all Integrated Library Systems (ILS). Also we support hardware integration with various payment systems, RFID tagging, security systems and more are being added all the time. We offer a generous software trial of 6 months, and discounts for rural libraries, or libraries with budget challenges. Call for a complimentary online demo.

|  |   |
|--|---|
| Requirements   | PC running Windows 7 or 10.<br>4 GB Ram |
| Touch screen is nice but not required. Most operations can be done with mouse or microphone! |   |

- NEW: Microphone Voice Recognition command aware. No touching required. Most buttons on the screen respond by just saying a word. Say “Done” to terminate the session, “Yes” or “No” to print or decline a receipt.
- NEW: Record transaction video to hard drive. Audit patron self-case-unlocking or EM strip desensitizing.
- Custom video and audible instructions allow your Patrons to use the system with confidence their very first time.
- RFID support. Includes conversion utility.
- Display fines owed. Pay right from self-check using cash or card. Blocks checkout if fines are greater than a set limit.
- Displays hold items ready for pickup.
- Audible cues. Volume can be set by staff or turned off. Patron can adjust volume for his or her session only.
- SIP2 Protocol. Sirsi-Dynix certified in 2006. Works with Atrium, Auto Graphics, Biblionix, Evergreen, Ex Libris, Innovative, Koha, OCLC, Polaris, TLC – The Library Corporation. Willing to test others.
- Reports: Send usage report to receipt printer right from touch screen. Instantly see usage for common periods i.e. daily, weekly, monthly subtotaled by media types. All transaction details are saved to MDB (Microsoft Access Database) for custom reporting, auditing.
- Customize text messages, audio, video with ease. Practically all file formats supported. Assistance with customization included free during support period.
- Receipts can be customized and include graphics.
- Multi language support.
- Suitable for unsecured or RF security (Place detuning paper receipt in pocket)
- Remote updates and support.
- Payment system integration with coin bill acceptors. Card payment compatible with most EMV systems and processors.
- Magnetic Stripe Reader (Magstripe) support.
- Source code available free with simple NDA. (Visual Basic DotNET).
